A brief history of Money

<p>People worry about it, think of ways to get more of it, and dream about how to spend it. But how much do we really know about money?</p> <p>Some of the earliest currencies were objects from nature. A (1) example is cowrie shells. Although they may seem a random choice, the shells had several advantages: they were similar in size, small, and (2) While the mollusks that produce the shells are found in the coastal waters of the Indian and Pacific oceans, the (3) of trade meant that even some European countries accepted cowrie shells as currency.</p> <p>Given that paper is widely believed to have (4) in China, it is fitting that this country introduced paper currency. It was made from the bark of mulberry trees (so, in a sense, money really did grow on trees). By the late 18th and 19th centuries, paper money had spread to other parts of the world. The bulk of this currency, however, was not money in the (5) sense. Instead, it served as promissory notes – promises to pay (6) amounts of gold and silver – which were key in the development of banks.</p>	<p>NOTE</p> <p>DURABILITY</p> <p>EXPAND</p> <p>ORIGIN</p> <p>TRADITION</p> <p>SPECIFY</p>
