

## **Comparison of motor transport technical schools in Krasnoyarsk**

**In Krasnoyarsk there are two motor transport technical schools, one is located in Kalinina Street and the other in 60 years of October.**

**I would like to tell about their positive and negative sides. Firstly in the College of transport and service there is an up-to-date technique, many laboratory rooms.**

**So positive sides are: new equipment, driving certificate, many specialties.**

**Negative points of our college are: not very good teachers, old building and it's not comfortable to study there. I decided to enter to the technical school which is located in Kalinina street because it is not far from home and many of my friends studied and study at this technical school and everyone is happy with it.**

**And to conclude, I want to say both of these technical schools are good, and choose in advance what do you want to become.**

### **The Philosophical Club**

**Hi! I would like to talk about our philosophy club. The Philosophical Circle appeared on March 21, 2022 in Krasnoyarsk Auto Transport College. It is headed by Triputina Alyona Alexandrovna. She is our history and philosophy teacher. In the philosophical circle, all the participants will attentively listen to you. The teacher will answer all the questions you didn't know the answer to. It will be asked about topics that interest you. And next meeting all will talk about this topic. In this circle you will always find something to talk about! I visit all the meeting with pleasure.**

### **My profession**

**The profession I'm studying is called car maintenance and repairing. Car maintenance and repairing is a complex of technological operations to maintain the performance of the car and its service ability. The profession includes a complex of daily maintenance, technical condition checks and fluid changing.**

**From the 2nd till the 4th school year, we study the following technical subjects: technical mechanics, car design, engineering graphics, electrical equipment, internal combustion engine and many others. The training includes 5 practices, 2 locksmiths, 2 professional and one pre-graduate.**

**Fourth-year students write graduate works. These works are presented at the end of the academic year.**

## **Krasnoyarsk Motor Transport College**

Greetings, dear friends! Now I tell you about our Motor Transport College. Krasnoyarsk Automobile Technical School is one of the leading educational institutions of Krasnoyarsk and the Krasnoyarsk territory. The college prepares by profession: car mechanic, driver of road and construction machinery, crane operator, logistician and many other professions related to transport. The college has existed since 1965, and today it is 57 years old. There have been four directions in the entire history of the college. At the moment, the college is headed by Sorokin Alexander Gennadievich. The educational process at the college includes: theoretical training; laboratory and practical classes; industrial training; industrial practice; out of school activities with students.

**The course of study in my speciality "car maintenance and repair" lasts 3 years and 10 months.**

**Our college is large and it has a large territory. In total, the territory of the college includes: a hostel, a gym, a huge number of garages and a territory for driving. There is also a laboratory of internal combustion engines in which we conducted many experiments.**

**In general, I like to study at this college, they teach and teach well here.**
